About Society

Vishwashanti Multipurpose Society

(Global Peace Multipurpose Society) was formulated on the Principles of STS (Science & Technology for Society) a movement which has a long history in science education reform and embraces a wide range of theories about the intersection between science & technology and society. The key aim behind these efforts was to ensure the development of a broad-based science curriculum, embedded in the socio-political and cultural contexts in which it was formulated.

To commemorate with Passionate principles of Science & Technology for Society) "Vishwashanti Multipurpose Society", Nagpur, Maharashtra, India has come up with two Scientific Research Journals for scientific society which are published four monthly in months of January, May & September. The two Journals are:

1. International Journal of Researches in Biosciences, Agriculture & Technology, IJBAT.
2. International Journal of Researches in Social Sciences & Information Studies, IJRSSIS.

VSMS path towards service to society is neither automatic nor inevitable...we know every step toward the goal requires sacrifice, suffering and struggle; the tireless exertions and passionate concern of our dedicated Directors.

Conference

Every scientist, through personal study and research, completes himself and his own humanity. ... Scientific research constitutes for you, as it does for many, the way for the personal encounter with truth, and perhaps the privileged place for the encounter itself with God, the Creator of heaven and earth. Through research each scientist grows as a human being and helps others to do likewise.

- Pope John Paul II

About ICSTS-2014

ICSTS 2014 is an International forum which provides a state-of-the-art platform to researchers in Science. It is coming up with its **1st International Congress On Science & Technology For Society**

With A Theme: Sustainable Biodiversity Conservation Through Technological And Social Approaches which will be held in Bangkok during May 23, 24 & 25, 2014. It is one of the leading Global conferences for presenting novel and fundamental advances in the fields of Science, Technology & Humanity. It will serve to foster communication amongst researchers and practitioners working in a wide variety of scientific areas with a common interest in enriching Science for Humanity related techniques.
